Product Integrity.....Guaranteed

- Are you getting what you paid for?
- Not all inoculants are treated equal!
- Promote guarantees product integrity, ensuring viability of live, safe bacteria cultures through the use of specialized technology & packaging. Promote uses only the highest quality, most stable ingredients in the world.
- High-Quality silage with a great fermentation profile is one of the most cost effective ways to help increase your bottom-line.
- Promote products are water-soluble. Microbial inoculants contain specially selected live, safe strains of Bacteria cultures for use with Forage Mix, Cereal, Sorghum & Corn Silages. It is designed to reduce dry matter loss, energy loss and protein degradation. It lowers forage temperature during storage and feed out, controls fermentation, easy to use and increases bunk life.
- **Promote SI, LC & CC are Lactic Acid Bacteria**
- **Promote ASB is a combination of Lactic Acid Bacteria & L. Buchneri Bacteria**

What we do

- Provide monthly testing reports at every stage of your forage program, including Fermentation Profiles, Density Score and Mold & Mycotoxin testing.
- We work as a team with your nutritionist & chopper. Promote is your forage focus team member, sharing the data testing results @ **No Added Cost** it's part of the services of working with us. Competitively priced in any market!
- **Responsive...** in the field, hands on support with unmatched follow through.
- **Quality is always the best investment. Promote raises your level of expectations. GUARANTEED!**
- **Call or email me anytime, with any questions on our Promote products, services & special pricing!**
